AVIATION DEFENCE TECHNOLOGIES

ADG-M1 Directional ANTI-DRONE GUN

ADG-M1 Mini Directional Anti-Drone gun is the world's first anti-drone defence product with an integrated warfare antenna. Its unique design makes it smaller, lighter, affordable, and more effective than any other similar product on the market.

ADG-M1 With its revolutionary design opens up opportunities for individuals and organizations to access anti-drone technology easily and it easily provides a cutting-edge solution to combat the growing threat of malicious drone attacks and other drone based threats

ADG-M1 is equipped with lithium-ion batteries that are specially designed to provide long runtimes and maximum efficiency. With these batteries, **ADG-M1** can shoot down more than **30 drones** on a single charge, making it an extremely powerful and effective anti-drone solution. This advanced battery technology is specially engineered to meet the demands of the Mini Drone Directed providing reliable and long-lasting power to ensure that it is always ready for action.

KEY FEATURES

FREQUENCIES

900 MHZ

1.2GHZ

2.4GHZ

5.8GHZ

OPTIONAL EXTRA FREQUENCIES CAN BE ADDED
IN PRODUCTION AS PER CUSTOMER REQUEST

ANTENNA

INTEGRATED
DIRECTIONAL

BATTERY LIFE

45+ MIN

FORM FACTOR

SWEP SIZE
TACTICAL

WEIGHT

4 Kg (*)

WEIGHT DEPENDS ON THE NUMBER OF
